PROFILE

To secure a role as a react web developer where I can utilize my over 2 years of experience in HTML, CSS, JavaScript, ReactJS, MongoDB, NodeJS, and the MERN stack to contribute to the success of the company. My strong problem-solving and communication abilities, as well as my ability to work well in a team, make me a valuable asset to any development team.

EXPERIENCE

Freelance Web Developer

- Consistently maintained a uniform look and visual theme across website by promoting consistent use of fonts, formatting, images, and layout.
- Designed and implemented a web form for clients to easily book appointments through a web browser using React, HTML, CSS, JavaScript, and Bootstrap.
- Implemented responsive design principles to deliver user-friendly websites.
- Demonstrated expertise in visual design by creating imaginative website designs using Adobe XD and Figma.
- Translated client requirements into effective application designs and system requirements using MERN Stack technologies.
